

## BAYART-KORMETAL – Mechanic

### **This is what you can expect from us.**

- A team of experienced mechanics who are eager to share their knowledge.
- A technical position with a lot of variety, where no day is the same. You will have the opportunity to support challenging assembly projects as well as grow within our mechanical maintenance department.
- During your career, a package of practical training courses (such as lifting and crane work) to keep your knowledge up to date.
- A family organisation where everybody knows each other and everybody wants to help a colleague.
- A nice salary package complemented by an expense allowance.
- The company does not have fixed annual closure periods, leave can be planned freely in agreement with your colleagues.
- Our head office is located in a traffic jam-free area, right next to the highway exit.

### **This is what you do.**

As a mechanic you will be responsible for the assembly of our metal constructions in, on or alongside technical installations at our customers' premises in the region:

- Assembling all kinds of structures.
- Moving entire machines or replacing parts in the installation.
- Performing hoisting work to get new parts into place.

In addition, depending on your interests, you may be called in on mechanical maintenance work:

- Replacing filters, seals, chains, bearings ...
- General maintenance in various sectors such as textiles, food, energy and mechanical engineering.
- Overhauling parts of large diesel engines.

### **This is you.**

- You get energy from a physically challenging job.
- You like variety and challenge in your job.
- You enjoy tinkering, either at home or at work.
